NO

For brukers oppmerksomhet

- For å unngå skade på kranen, skyll vannrørene før installasjon.
- Etter installasjon, sørg for at hver skjøt er forsvarlig forseglet med pakning og ikke lekker.
- Sørg for at varmt- og kaldtvannsrørene er riktig tilkoblet vannuttak

Rengjøring og vedlikehold

Armaturene tilbys i forskjellige overflater, blant annet mattbørstet, blankpolert og i en rekke keramiske overflater, såkalte PVD-overflater. Her benyttes en avansert produksjonsprosess, hvor et ultratynt keramisk lag legges til under vakuum. Denne behandlingen styrker holdbarheten til overflaten ytterligere.

For å bevare produktets utseende anbefales det aldri å bruke skuremidler, skuresvamp eller rengjøringsmidler som inneholder syre og ammoniakk. Rengjør overflatene regelmessig med en myk klut med vann eventuelt mildt såpevann.

Kalkavleiringer må fjernes med riktig rengjøringsmidler for å bevare produktets levetid.

EN

For users attention

- To avoid damage to the faucet, flush the water pipes before installation.
- After installation, make sure each joint safely sealed and does not leak.
- Make sure the hot and cold water pipes are connected correctly to wateroutlet.

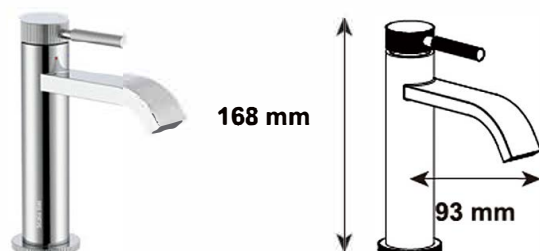

Cleaning and maintenance

We are able to offer a number of different finishes including brushed, polished and various PVD surfaces. PVD is an advanced production process, sometimes found on cutting tools, that adds an ultra thin ceramic layer that further enhances the durability of the surface.

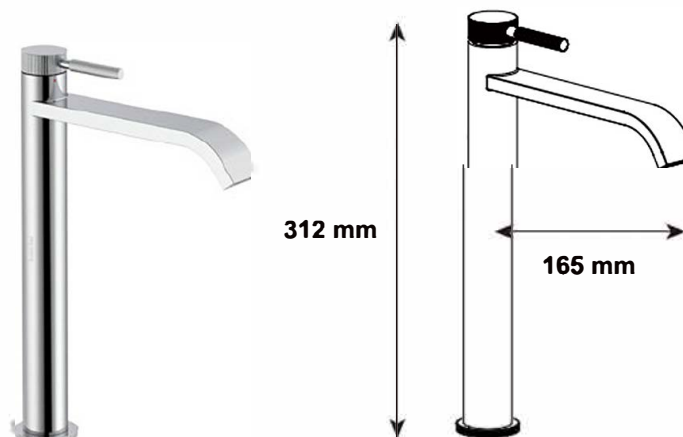

To maintain the apparanace of the fittings, we recommend a mild detergent and soft cloth should be used. Newer use abrasive cloths or any products containing acid ammonia or alcohol.

Limescale deposits must be removed with appropriate cleaning agents to preserve the lifespan of the product.

Vedlikehold:

Utskiftning av keramisk innsats
Penolskrue i håndtak løsnes
Ta av grepet
Fjern dekslet
Fjern den store monteringsmutteren
Ta ut keramisk innsats

Maintenance:

Cartridge replacement
Unscrew the fastening screw on handle
Remove the handle
Remove the cover
Remove the fastening screw
Remove the Cartridge
